**ATTACHMENTS:** a) Statement of Work for July 2016 – June 2017

---

**SUMMARY/BACKGROUND:** In September 2010 an IGA with Maricopa County for participation in AZLink, or COPLINK, was approved by Council. The services for COPLINK are now provided by IBM, an updated agreement/Statement of Work (SOW) is necessary for fiscal year 16/17.

COPLINK is a statewide law enforcement program for sharing criminal justice information across various local, state and federal agencies. It is an analysis toolset used by participating agencies for retrieval and analysis of repository information. There are two ways agencies can participate in the COPLINK program: 1) access information provided by contributing agencies, and 2) provide information for other agencies to access. Ownership and control of shared information remains with the contributing agency.

COPLINK is a network composed of four data centers that support all law enforcement agencies in Arizona. Based on intergovernmental data sharing, each participating agency is connected to one data center and has access to information across all four data centers. Information shared includes police department incident reports, jail booking information and mug shots, driver's license information, vehicle registrations, and much more. Information from the Department of Justice and Immigration and Customs Enforcement is also available. Each contributing agency works with IBM to merge data and establish an ongoing feed from the data source into the regional server. The Prescott Valley Police Department has been participating in the COPLINK network since 2010.

The charges for services provided by IBM are:

July 1, 2016 – June 30, 2017:                      \$3,825.00

These maintenance/service fees are included in the 16/17 Budget for the Police Department.
